## **DETAILED ACTION**

1. This office action is in response to amendment filed 12/01/2005.

### ***Replacement Drawing Sheets***

2. Drawings filed 07/26/2004 fail to comply with 37 CFR 1.121(d). Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). A replacement sheet must include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and within the top margin.

### **Annotated Drawing Sheets**

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheet(s) must be clearly labeled as "Annotated Sheet" and must be presented in the amendment or remarks section that explains the change(s) to the drawings.

### **Timing of Corrections**

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

**EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney on record Mr. Christopher R. Christenson on 2/13/2006.

The application has been amended as follows:

In claim 10, at the end, replace "indication of the generated current" with –indicative of the conductivity—

***Allowable Subject Matter***

4. Claims 1-13 are allowed.

***Reasons for Allowance***

5. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of the claims 1-9 is the inclusion of at least one toroid arranged to interact with the current return conductor to measure current flowing between the first and second electrodes through the process fluid provide an indication of

process fluid conductance. The above limitation in combination with remaining claims limitations is novel and is neither disclosed nor fairly suggested in the prior art.

The primary reason for allowance of the claims 10-13 is the inclusion of generating an electrical current between the first and second electrodes in the process fluid with a drive toroid by contacting the process fluid with first and second electrodes and measuring current through a current return path, the measured current through the current return path being indicative of the conductivity.

### *Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Berkcan (US 5,438,257) discloses sensor for measuring current in a region of a conduit comprising toroid 67 and current sensors 50, 54 (Fig. 5).

Cushing (US 3,286,522) electromagnetic flowmeter comprising toroid using non-contacting electrodes 140-143 (Fig. 10).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
